OysterMax^o permitted health claims.

Copper contributes to maintenance of normal connective tissues.

Copper contributes normal energy-yielding metabolism

Copper contributes to normal functioning of the nervous system

Copper contributes to normal hair pigmentation

Copper contributes to normal iron transport in the body

Copper contributes to normal skin pigmentation

Copper contributes to normal function of the immune system

Copper contributes to the protection of cells from oxidative stress

Zinc contributes to normal DNA synthesis

Zinc contributes to normal acid-base metabolism

Zinc contributes to normal carbohydrate metabolism

Zinc contributes to normal cognitive function

Zinc contributes to normal fertility and reproduction

Zinc contributes to normal macronutrient metabolism

Zinc contributes to normal metabolism of fatty acids

Zinc contributes to normal metabolism of vitamin A

Zinc contributes to normal protein synthesis

Zinc contributes to the maintenance of normal bones

Zinc contributes to the maintenance of normal hair

Zinc contributes to the maintenance of normal nails

Zinc contributes to the maintenance of normal skin

Zinc contributes to the maintenance of normal testosterone levels in the blood

Zinc contributes to the maintenance of normal vision

Zinc contributes to the normal function of the immune system

Zinc contributes to the protection of cells from oxidative stress

Zinc has a role in the process of cell division
